

Job Title: Biotechnology Research Summer Internship

Category: Nonexempt/Hourly **Department:** Molecular and Cellular Biology

Schedule: Summer internship; approximately June-August, 2021

This position is an on-site research laboratory role, subject to cancellation due to the pandemic

Full or part time: 20-40 hours per week; position may be extended into the fall.

Location: Seattle, WA

OncoResponse Inc., a Seattle-based privately held immuno-oncology company, has partnered with MD Anderson Cancer Center to deploy a unique and transformative approach to the discovery of cancer therapeutics. OncoResponse is leveraging the human immune system to identify fully human monoclonal antibodies and discover novel targets that will lead to the development of antibody-derived therapeutics for the treatment of cancer. For additional information, please visit <http://www.oncoresponseinc.com/>

We are seeking a self-motivated, enthusiastic and flexible Intern to join a team focused on the discovery and characterization of antibodies that modulate the immune system/tumor microenvironment for the treatment of cancer. In this role you will learn a wide-range of experimental techniques to support our efforts to develop antibody-based drugs. The position requires strong foundational knowledge of cellular and molecular biology, the ability to work on multiple projects simultaneously, and the enthusiasm to tackle new experimental techniques.

The successful candidate will have a creative, innovative, and inquisitive personality and will work directly with project teams to support discovery programs at OncoResponse.

Responsibilities:

- Assist laboratory staff as directed in the following areas:
 - Mammalian Tissue culture
 - DNA amplification/purification
 - Protein expression/purification
 - Assay development
 - General lab organizational tasks – cleaning, ordering, inventory

Qualifications:

- Minimum completion of 3 years college toward a BS in Cellular Biology, Molecular Biology, or related scientific field. Recent graduates also welcome to apply.
- Some hands-on laboratory experience preferred
- Attention to detail required
- Curiosity, flexibility and willingness to help team as needed
- Good interpersonal/team skills

Please email your resume with cover letter to: careers@oncoresponseinc.com for consideration.
