

OncoResponse

JOB TITLE: Research Associate – Cellular and Molecular Biology

OncoResponse Inc., a Seattle-based privately held immuno-oncology company, has partnered with MD Anderson Cancer Center to deploy a unique and transformative approach to the discovery of cancer therapeutics. OncoResponse is leveraging the human immune system to identify fully human monoclonal antibodies and discover novel targets that will lead to the development of antibody-derived therapeutics for the treatment of cancer. Be part of an exciting discovery process in the fight against cancer. OncoResponse offers a team-oriented, stimulating work environment, along with competitive compensation, benefits and stock options. Join a small, growing company and make a big difference! Please visit www.oncoresponseinc.com.

Please note: We are following robust COVID infection prevention guidelines. All of our employees who work on site are required to present proof of full vaccination status.

To apply, please email your resume and a cover letter to HR@oncoresponseinc.com

Responsibilities:

OncoResponse seeks a Research Associate to support our efforts to develop antibody-based immunotherapeutics to treat cancer. In this role you will utilize a wide range of experimental techniques to support our efforts to develop antibody-based therapies. The position requires strong foundational knowledge of cellular and molecular biology, the ability to work on multiple projects simultaneously, and the enthusiasm to tackle new experimental techniques.

- Perform *in vitro* experiments requiring cellular, molecular, and immunological techniques, including BSL2 tissue culture, cell-based assays, ELISAs, and flow cytometry; Train to develop and plan assays
- Execute experiments with careful attention to detail including the accurate recording of procedures, data, and results
- Work closely with project lead at all levels (including experimental design, implementation, and analysis) to rapidly advance research plan
- Participate in interactions with team members to present data and provide input on next steps

Preferred Qualifications:

- BS in Cellular Biology, Molecular Biology, or related field with a minimum of 1 year of relevant laboratory experience
- Required experience with cellular, molecular, and immunological techniques, including BSL2 tissue culture, cell-based assays, and ELISAs
- Highly organized with the ability to design, schedule, and perform experiments and balance multiple projects priorities
- Proficiency with Office (Excel, Word, PowerPoint, etc.) and scientific analytical programs (Prism, FlowJo, etc.)
- Experience with any of the following is a plus: Single cell cloning; flow cytometry; cell-based coculture assays with primary cells; immunofluorescence; differentiation of iPSC cells

OncoResponse offers a diverse, inclusive environment, and is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, age, gender identity, sexual orientation, color, religion, sex, marital status, national origin, protected veteran status, disability status, or any other status protected by federal, state, or local laws. We are committed to growing a company of diverse, ethical, mission-driven people who respect and value each other's contribution and differences.
