

OncoResponse

JOB TITLE: Research Scientist – Protein Chemistry

OncoResponse Inc. is a clinical stage, privately held immuno-oncology biotech company developing cancer immunotherapies using clues from the immune systems of elite cancer responders. In a broad strategic alliance with MD Anderson Cancer Center, OncoResponse deploys a proprietary B-cell discovery platform to identify and develop novel therapeutics targeting the tumor microenvironment. The company's lead candidate, OR2805, has entered clinical studies with a unique and transformative approach to the advancement of cancer therapeutics. Be part of an exciting discovery process in the fight against cancer. OncoResponse offers a team-oriented, stimulating work environment, along with competitive compensation, benefits and stock options. Join a small, growing company and make a big difference! Please visit www.oncoresponseinc.com.

Please note: We are following robust COVID infection prevention guidelines. All of our employees who work on site are required to present proof of full vaccination status (unless they have a medical or other legal exemption).

To apply, please email your resume and a cover letter to HR@oncoresponseinc.com

Responsibilities:

- Develop antibody-based immuno-therapeutics to treat cancer;
- Troubleshoot and tackle new experimental techniques;
- Utilize a wide range of experimental techniques in production, purification, and characterization of antigens and antibodies;
- Design, schedule, and perform experiments and balance multiple project priorities;
- Contribute to the build-out and upkeep of an expanding laboratory through maintaining shared equipment, assisting with laboratory housekeeping, and developing processes for improving workflow efficiency;
- Execute experiments with a careful attention to detail and accurately recording of procedures, data and results;
- Work closely with project lead at all levels (including experimental design, implementation, and analysis) to rapidly advance research plan;
- Develop and resent written and oral reports to multidisciplinary teams and provide input on next steps.

Preferred Qualifications:

- MS or PhD in Biochemistry or related field with a minimum of 3 years of relevant industry or academic experience;
- Experience in protein purification employing different chromatographic modes using AKTA instrumentation and Unicorn software;
- Experience performing protein modifications such as biotinylation, enzymatic or chemical cleavage, and fluorescence labeling;
- Experience carrying out various protein analytics including HPLC, ELISA, Western blotting, thermal denaturation, etc.;
- Experience with transductions and transient transfections for protein expression via BSL2 mammalian tissue culture;
- Proficiency with Office (Excel, Word, PowerPoint) and scientific analytical programs (Prism, FlowJo, Unicorn, etc.);
- Experience with any of the following is a plus: Protein engineering, automated liquid handlers and plate readers, ELISA assay development, Octet and MSD instrumentation, production of bispecific antibodies, bead-based protein pull-downs.

OncoResponse offers a diverse, inclusive environment, and is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, age, gender identity, sexual orientation, color, religion, sex, marital status, national origin, protected veteran status, disability status, or any other status protected by federal, state, or local laws. We are committed to growing a company of diverse, ethical, mission-driven people who respect and value each other's contribution and differences.
