

OncoResponse

JOB TITLE: Scientist/Sr. Scientist – ImmunoOncology

OncoResponse Inc., a Seattle-based privately held immuno-oncology company, has partnered with MD Anderson Cancer Center to deploy a unique and transformative approach to the discovery of cancer therapeutics. OncoResponse is leveraging the human immune system to identify fully human monoclonal antibodies and discover novel targets that will lead to the development of antibody-derived therapeutics for the treatment of cancer. Be part of an exciting discovery process in the fight against cancer. OncoResponse offers a team-oriented, stimulating work environment, along with competitive compensation, benefits and stock options. Join a small, growing company and make a big difference! Please visit www.oncoresponseinc.com.

Please note: We are following robust COVID infection prevention guidelines. All of our employees who work on site are required to present proof of full vaccination status (unless they have a medical or other legal exemption).

To apply, please email your resume and a cover letter to HR@oncoresponseinc.com

OncoResponse seeks a Scientist/Senior Scientist to make essential contributions to the discovery and development of therapeutic antibodies to drive the immune-oncology pipeline at our company. The successful candidate will be responsible for the design and execution of *in vitro* experiments related to the characterization of immunomodulatory antibodies in the tumor microenvironment.

Responsibilities:

- Design and execution of *in vitro* experiments related to the characterization of immunomodulatory antibodies in the tumor microenvironment;
- Optimize experimental systems;
- Develop and implement immunological assay for antibody evaluation and specific target validation;
- Analyze high dimensional flow cytometry data;
- Manage experimental studies and timelines in a fast-paced team environment;
- Work independently, establish strategies, and identify actions that drive projects in a team environment;
- Write reports summarizing experimental findings and present papers at internal and external meetings;
- Mentor junior scientists for performance, scientific advancement, and career growth

Preferred Qualifications:

- A PhD degree in Immunology, tumor immunology or related field with a minimum of 2 years of biopharmaceutical or 4 years of academic experience in cellular immunology;
- Strong hands-on expertise in *in vitro* immunology models and cell-based assays (NK cells, T cells, MDSC);
- Experience with immunophenotyping by flow cytometry and cytokine multiplexing;
- Molecular immunology and experience with analysis of high dimensional flow cytometry data (t-SNE, FlowSOM) is desired;

OncoResponse offers a diverse, inclusive environment, and is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, age, gender identity, sexual orientation, color, religion, sex, marital status, national origin, protected veteran status, disability status, or any other status protected by federal, state, or local laws. We are committed to growing a company of diverse, ethical, mission-driven people who respect and value each other's contribution and differences.

JOB TITLE: Scientist/Sr. Scientist – ImmunoOncology

Preferred Qualifications (cont'd):

- Self-motivated, able to balance work on multiple projects in a matrix environment, able to work independently as well as part of a team;
- Strong organizational skills in experimental design, execution, and data reporting;
- Strong leadership, interpersonal and communication skills, with an enthusiasm for participating in a fast-paced environment characterized by rigorous science and innovative thinking;
- Experience managing non-PhD scientists preferred
