

OncoResponse

JOB TITLE: Senior Research Associate/Associate Scientist – Protein Chemistry

OncoResponse Inc. is a clinical stage, privately held immuno-oncology biotech company developing cancer immunotherapies using clues from the immune systems of elite cancer responders. In a broad strategic alliance with MD Anderson Cancer Center, OncoResponse deploys a proprietary B-cell discovery platform to identify and develop novel therapeutics targeting the tumor microenvironment. The company's lead candidate, OR2805, has entered clinical studies with a unique and transformative approach to the advancement of cancer therapeutics. Be part of an exciting discovery process in the fight against cancer. OncoResponse offers a team-oriented, stimulating work environment, along with competitive compensation, benefits and stock options. Join a small, growing company and make a big difference! Please visit www.oncoresponseinc.com.

Please note: We are following robust COVID infection prevention guidelines. All of our employees who work on site are required to present proof of full vaccination status (unless they have a medical or other legal exemption).

To apply, please email your resume and a cover letter to HR@oncoresponseinc.com

OncoResponse seeks a Research Associate/Associate Scientist to support our efforts in developing antibody-based immunotherapeutics to treat cancer. In this role, the successful candidate will utilize a wide range of experimental techniques to support our efforts to develop these antibody-based therapies. The position requires strong foundational knowledge of protein chemistry, the ability to work on multiple projects simultaneously, and the enthusiasm to tackle new experimental techniques.

Responsibilities:

- Perform protein purifications, protein modifications, and protein analytics;
- Execute experiments with a careful attention to detail and accurately recording of procedures, data, and results;
- Work closely with project lead at all levels (including experimental design, implementation, and analysis) to rapidly advance research plan;
- Participate in interactions with team members to present data and provide input on next steps.

Preferred Qualifications:

- BS in Biochemistry or related field with a minimum of 1 year of relevant laboratory experience;
- Required experience with protein purification AKTA instrumentation and Unicorn software, protein analytics including SDS-PAGE and Western blotting, and protein modification including biotinylation, enzymatic or chemical cleavage, and fluorescence labeling;
- Experience with transient transfections for protein expression via BSL2 mammalian tissue culture;
- Highly organized with the ability to design, schedule, and perform experiments and balance multiple project priorities;
- Proficiency with Office (Excel, Word, PowerPoint) and scientific analytical programs (Prism, FlowJo, Unicorn, etc.);
- Experience with any of the following is a plus: ELISA assay development, thermal denaturation of proteins, production of bispecific antibodies, bead-based protein pull-downs.

OncoResponse offers a diverse, inclusive environment, and is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, age, gender identity, sexual orientation, color, religion, sex, marital status, national origin, protected veteran status, disability status, or any other status protected by federal, state, or local laws. We are committed to growing a company of diverse, ethical, mission-driven people who respect and value each other's contribution and differences.
